MACHINE IQ TELEMATICS KITS
REFERENCE GUIDE

Bobcat ®

One Tough Animal.

TOUGH AND SMART. Maximize uptime with retrofit telematics kits – giving you the full Bobcat® Machine IQ wireless communications experience, even for machines not equipped with telematics from the factory.

◗ Full functionality of the factory-installed telematics solution.

◗ Easy installation (in less than 1 hour) and plug-and-play connection.*

◗ No additional costs or subscription fees for dealer's portal usage or other related services. Kit price includes 3 years of service.

*Service Analyzer must be updated to the latest version.

CRITICAL CODE AWARENESS

• You can check all fault codes on your machine remotely (in the dealer's portal) to get ready for the maintenance service and be aware of your machine's health.

• You can also be notified about a critical code right when it occurs – so you can immediately alert your Service Manager, contact your customer, and schedule the service.

REGULAR MAINTENANCE PLANNING

• You can view the machine's hour meter to plan necessary maintenance precisely. Notification is sent every time the machine is due for service, so you never forget about the upcoming service.

• You can proactively contact your customers to schedule the maintenance at your mutual convenience and keep a record of performed services in the Machine IQ portal.

LOCATION MONITORING AND GEOFENCE

• You can review your machine's location online and access its location history.

• Geofence functionality allows you to set a monitored area and receive notification every time the machine enters or leaves the area.

Download the full privacy statement (ref **7375025**) in all languages from **Bobcat Online Publications**.

Please contact your Bobcat representative regarding GDPR compliance and privacy-related questions.

Please order Bobcat Machine IQ decal 7372049 for machines pre-equipped with Machine IQ on manufacturing stage. In Machine IQ Kits, the decal is included.
